PROFILE

Business & Information Systems student seeking a Forward Deployed AI Engineer internship. Brings Python, FastAPI, PostgreSQL, and React project experience, with strengths in data validation, user workflow design, and translating operational needs into software requirements.

EDUCATION

New Jersey Institute of Technology | Newark, NJ Expected May 2028

B.S. Business & Information Systems

TECHNICAL SKILLS

Programming: Python, JavaScript, MATLAB, HTML, CSS | Frameworks: FastAPI, React

Data and development: PostgreSQL, Git/GitHub, Linux, VS Code, data cleaning, API testing

Product and delivery: Requirements gathering, workflow mapping, Figma, usability testing, stakeholder communication

Certifications: AWS Certified Cloud Practitioner; Microsoft Azure Fundamentals

PROJECTS

Tempo | AI-Assisted School, Work & Life Planner Oct 2026

- Collaborated in a 24-hour hackathon on a Gemini-powered planner that uses calendar and task context to propose schedule changes for user approval.
- Configured PostgreSQL connectivity and verified two FastAPI operations for retrieving and updating planner data.
- Verified 213 synced Google Calendar events and resolved merge conflicts across two frontend and backend files.

ZipHeatMap | Geospatial Data Analytics | MATLAB 2025 - 2026

- Built an application to visualize U.S. population and frequency density; automated latitude and longitude mapping from a master dataset to reduce manual data entry.
- Developed a multi-tab interface for data filtering, statistical auditing, and map generation.

SelfGrow | Wellness & Goal Tracker | Figma Spring 2026

- Mapped three user workflows for onboarding, goal logging, and daily check-ins; translated usability feedback into clearer navigation across 4+ interface prototypes.

TECHNICAL LEADERSHIP

ALPFA NJIT | IT Committee Member / Intramural Team Captain Jan 2026 - Present

- Lead chapter app and member points system initiatives; work with committee members to define requirements, plan features, and coordinate implementation tasks.
- Test features, troubleshoot issues, and help prepare the application for deployment to chapter members.

EXPERIENCE

New Jersey Institute of Technology | Newark, NJ Jul 2025 - Present

University Advancement & Development Department Assistant

- Maintain database records, investigate discrepancies, and validate data to support accurate reporting and daily advancement operations.
- Coordinate with staff on document workflows, digitization, archival access, event logistics, and technical equipment setup.

Essex County Board of Elections | Essex County, NJ Nov 2023 - May 2024

Poll Worker / Election Administrator

- Set up voting equipment, trained staff on procedures, and verified voter records while escalating operational issues through established channels.
