Diego Guevara

Business & Information Systems Student · NJIT

diego.guevara107@gmail.com | linkedin.com/in/diegoguevara2093 | github.com/dlg309

PROFILE

Business and Information Systems student interested in forward deployed engineering and technical implementation. Experience with Python, React, FastAPI, and data workflows through coursework and collaborative projects. Interested in understanding user needs, testing solutions, and improving how people work.

EDUCATION

New Jersey Institute of Technology Expected May 2028

B.S. in Business and Information Systems

TECHNICAL SKILLS

Programming & web: Python, JavaScript, MATLAB, HTML, CSS, React, FastAPI

Data & development: PostgreSQL, Git and GitHub, Linux, VS Code, data cleaning, API testing

Product & collaboration: Requirements gathering, workflow mapping, Figma, usability testing, stakeholder communication

Certifications: AWS Certified Cloud Practitioner; Microsoft Azure Fundamentals

EXPERIENCE

New Jersey Institute of Technology Jul 2025–Present

Department Assistant, University Advancement & Development

- Maintain and update database records, checking information to support accurate reporting and day-to-day advancement operations.
- Investigate discrepancies in records and work with staff on document digitization and archival access.
- Support department operations by coordinating document workflows, event logistics, and technical equipment setup.

Essex County Board of Elections Nov 2023–May 2024

Poll Worker / Election Administrator

- Set up voting equipment to prepare the polling location for election operations.
- Verified voter records while following established election procedures.
- Trained staff on procedures and escalated operational issues through established channels.

SELECTED PROJECTS

Tempo · Collaborative Planning Application Oct 2026

Next.js · PostgreSQL · Gemini | GitHub repository

- Collaborated on the earlier hackathon planner, configuring PostgreSQL connectivity and verifying two FastAPI operations.
- Worked with a coding agent on a Next.js rebuild with task and calendar planning, optional Gemini assistance, and user review before schedule changes.
- Project checks included unit, database, and desktop/mobile browser tests; some external services were simulated.

ALPFA NJIT App · Collaborative Mobile App Contributor

Expo · React Native | Partner's GitHub repository

- Contribute to a chapter app for events, E-Board profiles, and photo sharing; my project partner owns the repository.
- Added E-Board member information and headshots, updated profile images, and contributed error fixes.
- Work with the IT committee on requirements and feature planning for chapter technology initiatives.

ZipHeatMap · Geospatial Data Analytics 2025–2026

MATLAB

- Developed a MATLAB application for my operations department to visualize where donors come from using ZIP-code frequency data.
- Matched uploaded ZIP codes with a reference dataset to supply geographic coordinates and flag invalid or unmatched entries for review.
- Organized state-level counts and frequency statistics in a multi-tab interface, with filters to focus the map on selected states.
- Provided exports for review data and the plotted map, allowing users to save a selected view as an image.

SELECTED PROJECTS · CONTINUED

SelfGrow · Wellness & Goal Tracker Spring 2026

Figma · Design prototype

- Mapped an onboarding workflow for a wellness and goal-tracking concept in Figma.
- Outlined goal logging and daily check-in flows to make core activities easier to navigate.
- Applied usability feedback to improve navigation across four or more interface prototypes.

LEADERSHIP & INVOLVEMENT

ALPFA NJIT Jan 2026–Present

IT Committee Member / Intramural Team Captain

- Work with committee members to define requirements and plan features for the chapter app and member points system.
- Coordinate implementation tasks with the team as chapter technology initiatives develop.
- Test features, troubleshoot issues, and help prepare the application for chapter members.

NJIT Legacy Leaders Member

- Volunteered at NJIT’s Student-Alumni Service Day, supporting the Newark community.
